I am a passionate and driven aspiring software developer in their second year of studies. Experienced in building database driven web applications and mobile apps through academic and personal projects.

Technical Skills

Programming Languages:

- Proficient: Python (Data Structures & Algorithms), XML & Java (Android Studio focused), HTML, CSS, JavaScript
- Familiar: C++ (Visual Studio environment)

Development Environments & Tools:

- IDEs: Android Studio, Visual Studio, VS Code, Spyder
- Design & Prototyping: Figma (UI/UX Design)
- Databases: DB Browser (SQLite), Oracle DBMS

Education

Bachelor of Science in Software Engineering

Eduvos, Midrand, South Africa | Expected Graduation: Nov 2026

Projects

1. My Trip Buddy App (Academic Project)
 - a. Developed a trip planning and memory saving app for a school project. This app was designed to simplify trip planning and allow users to create memories from their trips on the app and link them to a song they felt during the trip.
2. Photography App (AnonyK Creatives)
 - a. Created an app that allows people to book my services as a photographer. Currently it only allows people to book me and is only for android users, but I plan on expanding its functionality because a lot needs to be done.
3. "Prop24Seven" & "Agri24Seven" Apps (for GA-Mphela Pty (LTD))
 - a. Coming soon to the portfolio is a farming and property solutions app being developed for GA-Mphela. Inspired by Property24, these apps will form part of the company operations.
